Professional Summary

Motivated and detail-oriented aspiring web developer with an interest in creating modern, responsive, and user-friendly websites for individuals, businesses, and organizations. Passionate about technology, digital innovation, and developing practical solutions that improve online visibility and user experience. Committed to continuous learning, problem-solving, and delivering quality work that meets client requirements. Interested in website development, business websites, portfolio websites, landing pages, and digital solutions that help businesses establish and grow their online presence.

Work Experience

Freelancing/Fiverr 01/2026 – Nowadays
Frontend developer/web developer

Created and maintained scalable UI components and modular codebases.
Improved site performance and load times through optimization techniques.
Worked with Bootstrap and CSS frameworks to ensure responsive design.
Assisted in API integration and backend communication (e.g., CakePHP, MySQL if applicable).
Participated in code reviews and maintained coding standards.
Developed responsive, reusable UI components using HTML, CSS, and modern JavaScript frameworks.
Translated UI/UX designs (Figma/Adobe XD) into

pixel-perfect web interfaces.
Collaborated with designers and backend developers to deliver integrated, high-quality solutions.
Built dynamic web applications using frameworks such as React / Angular / Vue.js.
Integrated frontend applications with REST APIs and backend services.
Optimized applications for performance, scalability, and accessibility.
Conducted unit and automated testing to ensure reliability.
Debugged and resolved complex frontend issues across browsers and devices.

Freelance Web Developer / Website Designer 11/2025 – Nowadays
Web Developer / Website Designer

Design and develop websites according to client requirements.
Create responsive layouts for different screen sizes.
Organize website content for clarity and usability.
Test websites and troubleshoot layout or functionality issues.
Maintain and update website content.
Communicate with clients to understand project requirements.
